Kief Studio

Build. Protect. Automate. Support.

Stop juggling tech vendors.

Your website, your security, your servers, your day-to-day tech needs -- all handled by one team. The same people who set it up are the ones who keep it running. No ticket queues, no finger-pointing, no middlemen.

Kief Studio is a husband-and-wife team with 20+ years of experience, 40+ custom-built tools, and the combined skillset of a 10-14 person team. We serve small businesses across healthcare, cannabis, legal, e-commerce, non-profit, and creator industries.

Build

Websites, web apps, online stores, ERP systems, and custom software -- built for your business, not from a template. You own everything we build.

- Modern websites with full content management

- E-commerce with payment processing and inventory

- Business systems (CRM, accounting, HR, inventory)

- Data platforms handling 121M+ records with sub-second search

- Custom APIs, integrations, and internal tools

Protect

Security you don't have to think about. We lock down your systems, watch for threats 24/7, and keep everything patched. You get clear reports. We handle the rest.

- 500+ integrated security tools, 25+ AI-powered assessment agents

- Vulnerability scanning with actual fixes, not just reports

- Post-quantum SSH hardening, firewall management, access control

- Automated updates and patching on schedule

- Monthly plain-English security reports for compliance and insurance

Automate

Less busywork, more business. We automate the repetitive tasks that eat your team's time -- so they can focus on what actually grows the business.

- Daily content pipeline: blog posts, social media, video, PDFs

- Automated quality scoring that rejects AI slop

- Email campaigns, follow-ups, and lead workflows

- Report generation and data analysis

- Custom workflow automation for your specific operations

Support

Real people, real fast. When something needs attention, you reach the people who built your systems. Not a call center. Not a ticket queue.

- 15-minute average response time

- 24/7 monitoring on every system

• The same humans every time -- we know your setup

• 3am crisis? We pick up.

• 13+ year client relationships. Zero clients lost to a breach.

Plans

Managed Website -- from $399/mo Hosting, CMS, SSL, patching, monitoring, and dedicated support.

Dedicated Setup -- $999/mo Your own servers, hardened security, vulnerability scanning, monthly reports.

Full Tech Team -- $4,999/mo Your entire technology department. Security, automation, strategy, and priority support.

Server costs included. One bill. No surprises.

Get Started

First conversation is free. You talk to the people who'll actually do the work.
